Capability Statement

psn.net

Private Social Networks™ is a technology company that offers a secure and private cloud based platform for secure and private communication and collaboration. Our technology enables organizations to create private branded communities and sub communities with feature rich capabilities in a highly secure and compliant environment built on a robust authentication system.

Any organization that needs to communicate and collaborate in a secure environment, and maintain & control (members and content) can leverage our solution and with our unique bi-directional, multi-lingual translation capabilities to deliver powerful solutions on a global basis. Our platform is offered as a cloud-based service based on a subscription business model.

CORE COMPETENCIES

Information Technology Security

Private Social Networks was founded by IT security professionals with a focus on providing highly secure, cloud based technologies for communication and collaboration. Our products enable customers in Healthcare, State and Local Government and Federal Government organizations to communicate sensitive information on a platform that is highly secure and encrypted but easy to use. Our technology is certified HIPAA Compliant, PCI Compliant, SSAE 16 SOC 1 Type 2 SOC 2 Type 2, and SOC 3 Type 2

Cloud Technology

The emergence of the cloud as a computing platform has helped organizations significantly reduce costs. Private Social Networks powerful cloud technologies provides the power to support large organizations with demands for high security and mobility. We offer secure and private cloud based messaging, HIPAA Compliant Cloud file storage, HIPAA Compliant Email and HIPAA Compliant SFTP

Mobile Applications

All of Private Social Networks' products come with mobile applications that give users the ability to communicate and collaborate while on the go. Our highly secure and encrypted communication platform enables customers to communicate sensitive information while giving them the freedom of a mobile application.

DIFFERENTIATORS

- Established in 2008
- Small focused team of IT Security Professionals
- Federal Government, State and Local Agencies and Healthcare Organizations are literally under attack from foreign governments, clandestine operations and hacker organizations that seek to do harm to the USA or sell sensitive information to the highest bidder. Private Social Networks offers the state of the art, highly secure, cloud based platform for private communication and collaboration.

PAST PERFORMANCES

St Jude Children's Research Hospital

- Memphis, Tennessee
- Customer since 2010
- St Jude required a highly secure, HIPAA compliant communication and collaboration system to manage patient relations on a global basis. They selected PSN because we were the only company that could meet their strict security requirements, while providing the ease of use and features of a robust cloud based platform that includes a mobile application
